T-CAIREM has announced the launch of the Temerty Innovation Grants for AI in Medicine, with the goal of advancing research, education, knowledge dissemination and digital infrastructure in the field of AI in medicine. T-CAIREM at the University of Toronto is an interdepartmental Centre that serves as a focal point for collaboration between computer scientists, healthcare providers, trainees, medical basic science researchers and industry to advance health through machine learning.

Objectives of the Temerty Innovation Grants for AI in Medicine:

- To identify promising high risk, high reward ideas that will transform healthcare over the next 20 years in AI in medicine.
- To encourage researchers to transcend boundaries by using diverse datasets and new technologies to improve care efficiency or patient outcomes.
- To stimulate the creation of a collaborative community focused on the innovation and implementation of AI in medicine.

Funding information:

- **Maximum Amount:** Up to $200,000
- **Duration:** One year, with possibility of extension to two
- **Eligibility:** One of the Principal Investigators on an application must have a T-CAIREM affiliation

**IMPORTANT DATES**
- **Application deadline:** 5:00pm EST, March 1, 2021
- **Funding announced:** Summer 2021

**Note:** This funding is being managed by T-CAIREM. Applicants do not need to create an MRA.
